Summary

Software Engineer specializing in enterprise Java applications, ERP platforms, backend systems, and application security. Experienced in developing and maintaining production-grade systems using Java, Spring Boot, Spring MVC, Spring Security, MySQL, Redis, Hibernate, REST APIs, Angular, jQuery, and modern web technologies. Hands-on experience across non-banking financial software and large-scale ERP platforms, including authentication, authorization, third-party integrations, database optimization, cloud-oriented architecture, and high-volume enterprise workflows.

Experience

Thots2It Technology

January 2025 – Present

Software Engineer

Madurai, Tamil Nadu

- Developed and maintained **enterprise financial and ERP applications** using Java, Spring Boot, Spring MVC, Spring Security, MySQL, and modern web technologies across production environments.
- Worked on backend services, authentication, authorization, application security, database operations, REST APIs, integrations, and complex enterprise business workflows.
- Developed responsive interfaces using **Angular, JSP, Thymeleaf, jQuery, Bootstrap, and JavaScript**, integrating frontend workflows with secure backend APIs.
- Optimized MySQL queries and application-level database operations for large enterprise workloads, while troubleshooting production issues and supporting post-deployment releases.
- Collaborated with development teams to analyze requirements, design solutions, resolve production issues, and deliver enterprise features in an agile development environment.

Credo Systems

July 2024 – October 2024

Core Java Trainee

Chennai, Tamil Nadu

- Completed a 3-month Core Java training program covering **OOP, exception handling, collections, multithreading, and real-time coding practices**.
- Developed mini projects and completed coding exercises to strengthen Java programming, debugging, and problem-solving skills.

Technical Skills

Languages: Java, JavaScript, SQL, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices

Frontend: Angular, JSP, Thymeleaf, jQuery, Bootstrap 5, Select2.js

Database & Performance: MySQL 5.0/8.0, Redis, SQL Optimization, Database Design

Security & Authentication: Authentication, Authorization, RBAC, Application Security, Fingerprint Authentication, AI/Visual Authentication

Enterprise Development: ERP Systems, Financial Software, Third-Party Integration, Plugin Integration, Production Support

Other Technologies: Three.js, Git, Cloud-Oriented Architecture

Education

Saranathan College of Engineering

2020 – 2024

B.Tech – Information Technology

Trichy, Tamil Nadu

CGPA: 8.35

HSC: New Sanggeeth Matric Hr. Sec. School, Mimisal – **81%**

SSLC: New Sanggeeth Matric Hr. Sec. School, Mimisal – **92%**

Enterprise Projects

- FINX – Enterprise Non-Banking Financial Software:** Contributed to an enterprise non-banking financial platform using **Java, MySQL, Spring MVC, authentication, and application security**. Worked across financial business workflows, database operations, secure access control, and banking-domain functionality. Contributed to **third-party/plugin integrations**, including fingerprint-based authentication and AI/visual authentication workflows. [Reference]
- Go-Digital ERP – Sevalaya Trust:** Contributed to a large-scale ERP platform supporting multiple operational modules and high-volume enterprise workflows. Worked with **Java, Spring MVC, Hibernate, JSP, MySQL, jQuery, and Bootstrap 5** across application development, security, authentication, database operations, integrations, cloud-oriented architecture, and production support. [Reference]
- Lion Dates Enterprise ERP – Lion Dates Impex Pvt. Ltd.:** Developed and supported an enterprise ERP platform serving operations across India, covering **Production, Dispatch, Inventory, HRMS, Vehicle, and Payment** workflows. Built backend functionality using **Spring Boot, Spring Security, MySQL, and Redis**, with frontend and visualization technologies including **Angular, jQuery, and Three.js**. Worked across full-stack development, security, integrations, database operations, and post-deployment production support. [Reference]
